

MEET YOUR PERFORMANCE PARTNER.

R&D AND INNOVATION POWER

Designing the Packaging Technologies of the Future

At Makro Chemical, the foundation of our success lies in our passion for continuous development and technical excellence.

ABOUT US

Founded in 1996 in İzmir, Makro Chemical is Türkiye's first flexible packaging adhesive manufacturer. Today, with an export network reaching more than 40 countries, we are the "invisible force" of the industry and a global performance partner. We combine the experience of the past with the technologies of the future.

Innovation-Driven R&D

In our modern laboratory, we don't just produce for today we design the packaging technologies of tomorrow. We define food safety and high barrier performance standards with scientific precision.

Tailor-Made Solutions

Every production line is unique. We go beyond standard products and develop custom formulations that best fit your machinery, line speed, and packaging structure.

OUR PRODUCT GROUPS

- 01 Solvent-Based Lamination Adhesives:**
High-performance solutions for high line speeds and excellent optical clarity.
- 02 Solvent-Free Systems:**
Environmentally friendly technologies focused on sustainable production and a low carbon footprint.
- 03 Cold Seal Applications:**
High-precision sealing for heat-sensitive food packaging (such as chocolate, ice cream, etc.).
- 04 Water-Based Solutions:**
Natural and strong bonding solutions for paper and cardboard packaging.

WHAT WE DO

We develop high-performance and sustainable chemical solutions for the flexible packaging industry:

Lamination Adhesives:

High bonding performance with solvent-based, solvent-free, and water-based systems.

Cold Seal Technologies:

Sensitive sealing solutions for heat-sensitive foods.

Tailor-Made R&D:

Optimized formulations customized for your production line.

Sustainability:

Next-generation, environmentally friendly technologies that support recycling.

Meet Your Performance Partner.

At every layer of your production line, we stand by your side with our 30 years of technical expertise and R&D strength. Get in touch with our expert team to discover seamless lamination processes and our high-performance solutions.
